

Uplinx® Report Tool for Cisco Unified Communication 6, 7 and 8 Configuration and Phone Inventory Reports

Uplinx® Report Tool produces the following reports for a Cisco telephony system:

- **Cisco Unified Communication Manager CUCM 6, 7 and 8**
Configuration Report with all 152 objects.
- **Cisco Unified Presence Server CUPS 6, 7 and 8**
Configuration Report with all 63 objects.
- **Cisco Unity Connection CUC 6, 7, 8**
Configuration Report with all 70 objects.
- **Phone Inventory Report**

Word, CHM and CSV formats within minutes on your PC, based on your templates and according to a variety of report settings.

Versatile Usage

Create professional reports and simplify your project documentation, analysis and reporting for the following purposes:

- As-built documentation
- Audits
- Management reports
- Verification of configuration
- Design, Operational support cases
- Backup
- Inventory of phones, including location (switch port) and serial numbers for Cisco SMARTnet® service

Report Format

The Uplinx® Report Tool produces reports based on your templates in the formats:

- Microsoft Word, HTML, CSV
- CHM used by Microsoft HTML Help

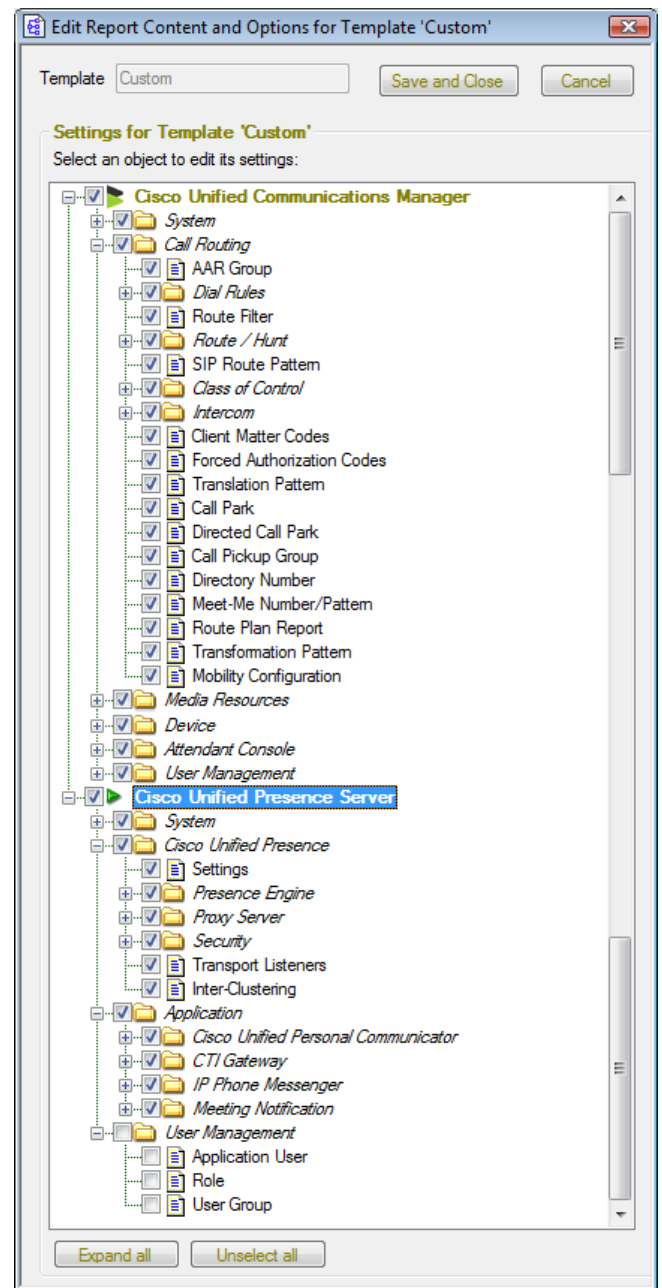

These reports can be easily modified to your needs and then converted to PDF.

Sample Reports

Sample reports can be found on [our web site](#).

Configuration report objects

All configuration objects of CUCM, CUPS, CUC are fully reported on with customizable descriptions.

The settings for the report content specify which objects are included and reporting options.

Automatically generate reports in no time

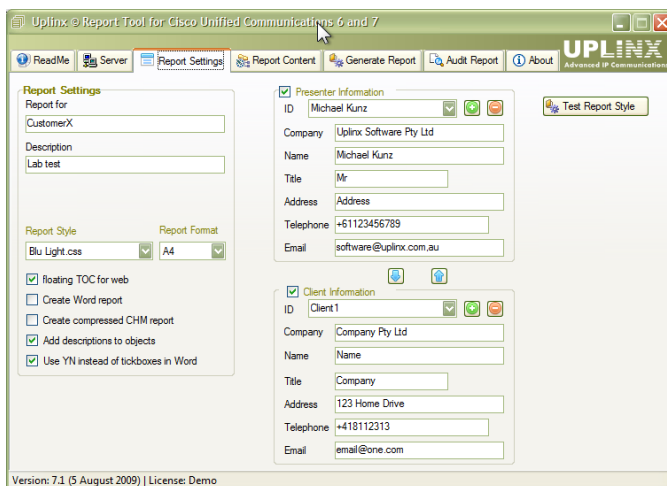

Phone Inventory Report

The Phone Inventory Report lists the MAC, serial number, phone model, registration status, MWI, hardware and software versions, switch neighbour and port info of all phones.

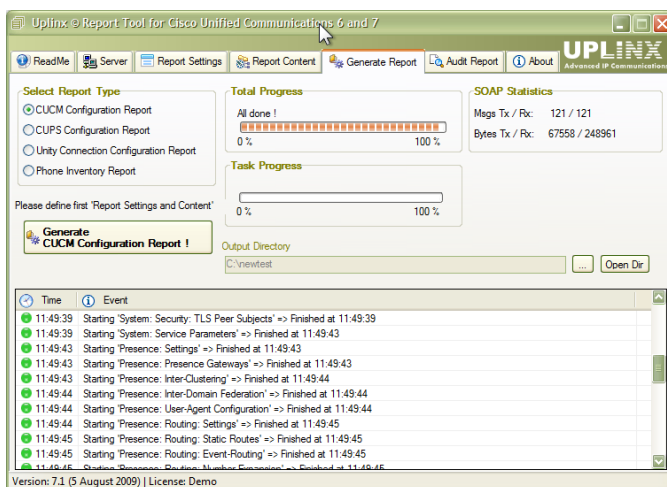

The phone summary lists the number of registered and unregistered phones by model.

Report Generation and Options

Reports can be based on your templates and styles to reflect your corporate identity.

The report settings allow you to define report title, comment, formatting style and paper format, descriptions of objects and table of content.

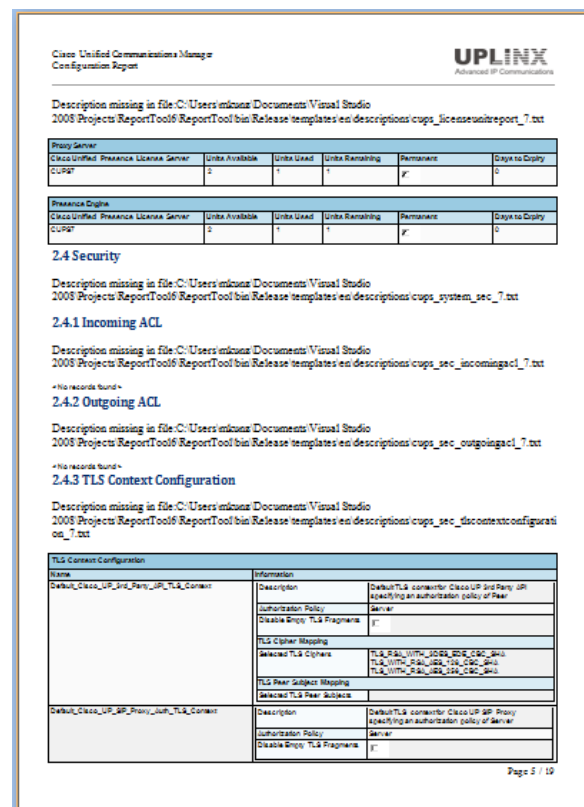

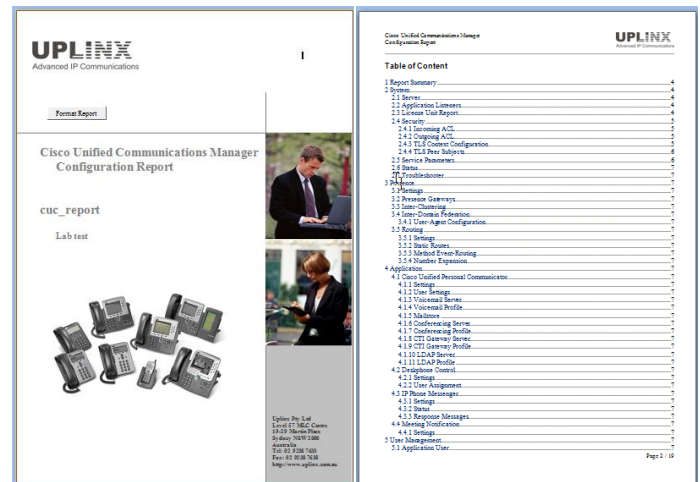

Generate tab which produces the report.

System Requirements

- PC with min. 1GB RAM, 1.6 GHz CPU, Windows Vista or XP SP2/3 with .Net 2.0 SP1
- (optional) Microsoft Word 2007/2010 to generate Word reports

Generated reports

Reports are automatically generated in Word 2007/2010, HTML and CHM formats with descriptions and can be fully customised with your own descriptions and templates.

License Options

- **Standard license**

The Standard license provides unlimited reports on one PC for one CUCM cluster.

- **Professional license**

The Professional license provides unlimited reports on one PC for any number of CUCM clusters.

- **Enterprise license**

The Enterprise license provides unlimited reports on any number of PCs for any number of CUCM clusters.

The Standard and Professional license is bound to a major CUCM release.

All licenses are RTU (Right To Use) for one (1) year and entitle the holder to all product fixes, feature enhancements and support for one (1) year.

Download Free Trial

Please download and try a fully functional demo version before you buy. The free version does not report every third record.

Simply add a license key to obtain a fully licensed version.
